

Town of Morrisville
Wake County, NC
Population: 32,000

OBJECTIVES

- Install Verkada security cameras for public facilities
- Convert old and install new door access to town facility buildings over to Verkada platform
- Utilize Verkada's LPR system to capture visitors to public park

HOW IT STARTED

The town of Morrisville was looking for a cloud-based platform that would serve their growing community. They were intrigued by the new technology that Verkada was developing. BAS installed cameras to public recreation facilities, senior center, town hall, fire and police stations and began converting access control system to Verkada platform.

HOW ITS GOING

The cameras have been able to capture multiple break-ins, accidents on nearby roadways, and other incidents since installation began in 2021. Morrisville continues to add new security features, such as access controlled doors and intercoms throughout the town. The system is growing as rapidly growth as the city. Seems like there is always a new project in Morrisville!

Challenges

- Various locations need wireless internet access and alternate power source
- Use existing wiring to change-over door access control to Verkada system

Solutions

- Cambium PTP Products
- Verkada Security Systems
